---

Nowhere in the world is a larger stage set for a modern day performance of Dante's Divine Comedy, than in South Africa.

The whole South Africa is a stage for Dante's Divine Comedy.

But it is a stage on which the stage lights are shining dimmer by the hour.

For the careful observer, the lasting impression is rather the witnessing of The Dying Swan.

In 1994, the communist-led ANC/SACP government finally took control of South Africa; an event that was ordered in 1928 by the Comintern in the USSR. The process was then started by the chairman of the South African Communist Party, Bill Andrews.

In 1988, when Gorbachof, announced the end of financial aid for liberation movements in Africa, the South African Communist Party, announced at it's Seventh Annual Congress in Havana, in 1989, that : "We will erect our own East Germany in South Africa" after the fall of the National Party government in South Africa.

And the cadgers of the African National Congress are swimming in rivers of gold. They are discovering their prevalent animal natures, hidden up until 1994, by the governing Protestant value system back then.

But times have changed.

Zuma has discovered the sexual prowess of the leopard, with the arrival of his ? 20<sup>th</sup> child. The government has discovered their scavenging nature of the hyena, with more than ninety percent of government officials involved in corrupt business practices. The whole of government are being described as 'The Biggest Organized Crime Syndicate in South Africa" by Sunday

Newspaper Editors; black and white alike.

But the public cheated out of their tax money for 16 years, after receiving no services from government in any department in return, has discovered another animal on the government stage, namely a government with the governing skills of a chimpanzee.

Already academics like Dr Jan du Plessis are preparing management models for the upper echelons of big business, with a Somalian-like scenario, in which there is a total lack of government, with a countryside governed by war-lords, controlling different regions. All capital and goods in these areas belong to these various war-lords.

In a country with a government unwilling and unable to govern, the warlord with an anti-aircraft gun mounted on a bull-bar at the back of a Toyota Land Cruiser, is king.

Already the Internally Displaced Persons of the boer population amounts to almost 800 000.

Although holding more than fifty percent of all post-graduate qualifications in South Africa, the boer population is prevented from having gainful employment in the economy, because of the ANC/SACP's Affirmative Action laws, barring Boers from the workplace.

This state-induced famine of the Boers, is further exacerbated by the fact that from 2005 to 2010, the government reduced the number of whites in the government sector from 96 000 to approximately 86 000. Whilst delivering whites government employees to circumstances of adject poverty, the ANC/SACP in a grandiose scale of nepotism, power, and willingness to starve the Boers, has paved the way for 200 000 more black people to enter government.

Like an upside-down pyramid, more weight has been added to the top.

This is against nature, and against the laws of gravity.

This structure is going to fall.

This country devoid of any form of governance has been reduced to a slum-filled and crime-infested hell-hole, with a massive and top-heavy pyramid about to crash on everyone's heads.

This government has started to copy Mugabe, when he drove out 'the scum' in and around Harare in Operation Murambatsvina in 2005.

In and around Pretoria, the ANC/SACP government is breaking down the homes of these impoverished Caucasian Boers, to try and get rid of any evidence of a state-induced famine amongs these people. This follows uneasy questions in the EU, to Zuma, by a Flemish politician, regarding the slaughter of Boers in South Africa.

What was meant by Zuma's blunt lie, 'that everything is under control' became clear recently.

Everything is under control of the demolishers that are attempting to eradicate the evidence of an incremental, and carefully planned genocide of the Boers, by the ANC/SACP government.

For Maria Schoeman, ( 70) the journey through Dante's river has ended. She suffered from brain, liver, and stomach cancer. She was repeatedly refuses treatment at government hospitals. She was also refused any government allowance of any kind.

Maria died a couple of weeks ago.

All this is happening while the ANC/SACP government is paying out billions of rands to so-called 'illegal immigrants', people that are in fact only absconding populations of countries ruined by themselves, and which are now simply flocking to the next scavenging grounds

available, in this case, South Africa.

The opportunity costs of swimming in a river of gold is simply enormous.

Mines are being turned in socialist entities, with proceeds the sale of resources, used to pay salaries for unproductive socialist union members, and electricity bills of another ineffective utility company, Eskom.

Banks like ABSA are paying junior black employees, three times the salary, of any senior white counterpart.

Universities are being flooded with so-called 'struggle cadets', which is simply another word for uneducated blacks or family.

Needless to say, academic research and articles published, has dropped from being one of the highest in the world, science and engineering fields included, pre-1994, to almost being on par with the 200 square kilometer island of Sao Tome and Principe.

And as a country's production and manufacturing ability, depends on it's scientific base, the end result and nett conclusion is obvious.

America's space-program had enormous spin-offs for it's manufacturing capability countrywide.

The policy of changing South Africa's universities from academic and research institutions, to institutions employing political cadets of the ANC, is simply the death knell for these institutions as well. There will be, unfortunately no spin-offs for the manufacturing sector, from a policy of cronyism in universities.

In places like Krugersdorp West, Triomf, nowadays Sophiatown, Newlands in Gauteng, Sunnyside in Pretoria, young Boers daughters are forced into a life of prostitution and drug use in order to survive, finally capitulating to the efforts of a community of 600 000 illegal Nigerians, whose main trade is drug distributions, and financial scams.

In Sunnyside these little Boer girls, can be witnessed being beaten up before six o' clock in the morning, if they didn't entertain 'enough clients' the previous night.

In these areas, whole police stations form part of the transnational crime syndicate's, who in 1994 received their biggest prize ever : South Africa.

In all aspects, South Africa is a failed state.

Suicides amongst Boer children have doubled the past year, and twice as many Boers are dying from suicide on a daily basis, than from the slaughter at the hands of black genocidaires daily.

For many Boers, becoming human again, and reaching the top of Dante's mountain, will only achieved at death.
